A Partner in the Team

For over 130 years, the Terberg Group of Companies has been driven to provide the best to the worlds specialist vehicle markets.

With 24 operating divisions in 5 countries, Terberg is one of the largest independent specialist vehicle suppliers, from cars to trucks, conversions to new builds, Terberg leads the way.

The Terberg Group have been moving forward with an emphasis on invention, innovation, transformation and value creation.

We believe that these elements are essential in optimising our services to the worldwide logistics and transport market sectors.

Terberg is a family owned business, with a history reaching back over 130 years, currently with 24 operating divisions throughout Europe, with sales across the world.

Terberg offer more than the traditional suppliers, by providing more resources to meet the needs of our customers worldwide.

Through this knowledge, we deliver solutions that satisfy our customers requirements for current and future vehicle programmes and the continued care of their vehicles, in the after market.

“In house” and field-testing, along with a programme of supply chain management expertise, allow our customers to have the confidence that Terberg can support the product throughout its life.

This approach of whole life involvement, enables Terberg not only to provide the best equipment for a given application, but gives the customer the comfort that the supplier is never far away.

We are also approaching relationship building in a new way, a way that we see as a potential new business model for the automotive industry.

Terberg DTS UK, is a market leader in the provision of vehicles and solutions to the specialist vehicle market sectors, across Europe and beyond.

Based in Halifax West Yorkshire in a purpose built facility, Terberg DTS are able to provide a one-stop shop for the supply, support and repair of a range of specialist vehicles.

Distribution

Building on the success of our market leading range of distribution tractors, has allowed Terberg DTS to focus on the support services required to keep the UK logistics market operational 24/7.

Terberg DTS's approach to service and support is unique in the UK, with a standard of service which cannot be equalled. Our team provides 24hr support both over the phone and on site. Planned and VOR repairs, contract

maintenance packages, along with a number of vehicle purchase plans, allow Terberg DTS to provide the right solution, on budget and on time. In addition, Terberg DTS has been working closely with agencies and operators to improve the level of safety and operator awareness in the sector, offering a series of training packages for both the drivers and support staff.

Seaport & Industrial

Terberg DTS provides a number of services for industrial and seaport market sector customers, who operate the range of RT and TT tractors. With operator and technician training through to parts and service support, Terberg DTS are on call 24 hrs, to keep key equipment operational. Working closely with suppliers such as Volvo and Cummins, ZF and Allison, Terberg aim to provide an unequalled level of up time.

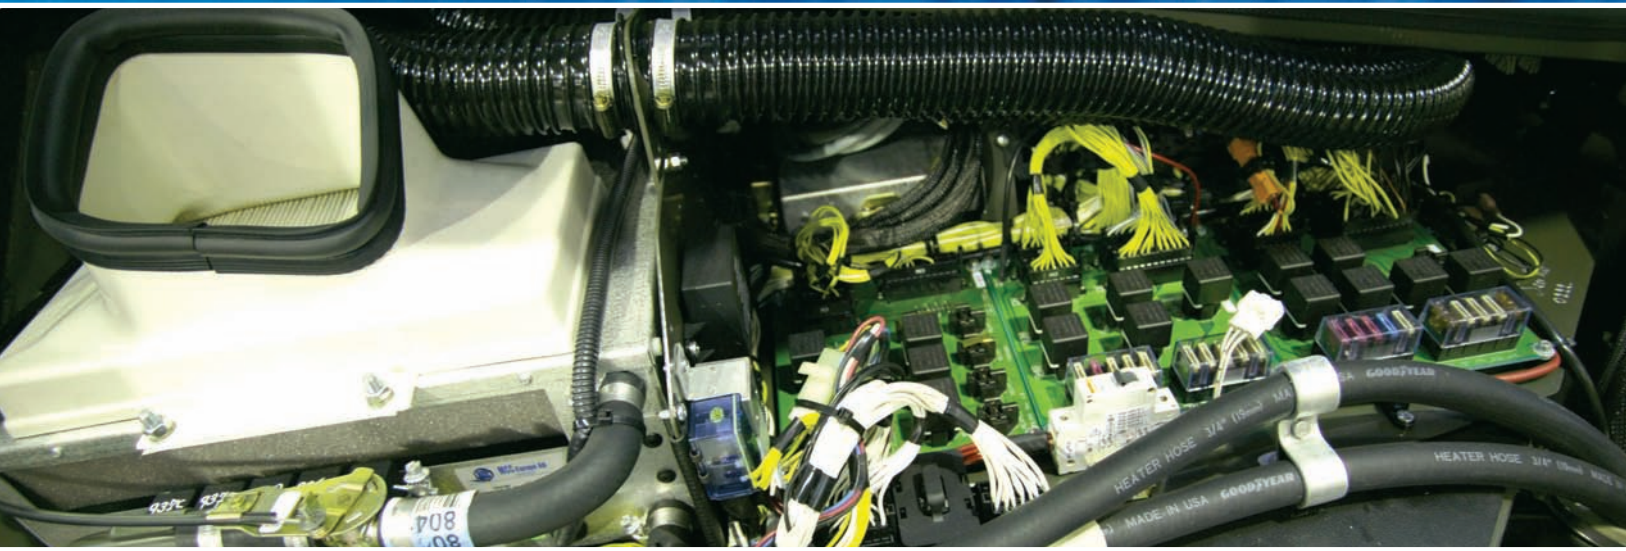

Aviation

Terberg DTS is proud to supply new and used equipment for the global aviation market, for both civilian and military customers. Terberg DTS has the ability to provide a range of specialist vehicle repair and refurbishment facilities for the aviation market. Having built on years of experience, our engineers are able to undertake work on various pieces of equipment, from tow tractors through to Aircraft loaders. In addition to our repair and refurbishment facilities, Terberg DTS offer a range of onsite inspection packages, training, commissioning and sales options for the market sector.

Special Vehicles

Utilising the resources of our own group, which is one of Europe's largest independent vehicle converters, Terberg DTS offer a number of special vehicle conversions for civilian and governmental departments. From small minor modifications to complete vehicle restyling, we are able to offer bespoke solutions to our customers needs.
